DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Regarding claim 1:

The primary reason for the allowance of claim 1 is the inclusion of the step of constructing a projection matrix by projecting each of said characteristic measurements of said matrix onto said subset to calculate a residual error. It is this feature found in the claim, as it are claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes this claim allowable over the prior art.

Claims 2-13 are allowed due to their dependency on claim 11.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ayers et al. (USPN 3,863,489) teaches analysis of chromatographic peaks by moments, Frans (USPN 4,835,708) teaches a method and apparatus for analysis of chromatograms using cross correlation and moment analysis, Harris et al. (USPN 4,353,242) teaches a multichannel detection and resolution of chromatographic peaks, Lacey (USPN 4,7807,148) teaches deconvolving chromatographic peaks, Keller (USPN 4,544,840) teaches a fiber optic fluid impurity detector and Mito et al. (USPN 4,482,966) teaches a detector for chromatographs
